

**2023** *CRDN*

Then, in 2023, after surviving the pandemic, AJ and the Exclusively Contents team met with Wayne, the founder of CRDN. They quickly signed up for the CRDN of South Los Angeles, excited to be part of a network of the best contents restoration professionals in the industry. Today, Exclusively Contents is proud to be IICRC certified and part of the CRDN family.

Looking back on the founding of the business, AJ and the team are grateful for the opportunity to have worked with Luis and to continue his legacy in the contents restoration industry. They know that there will always be new challenges to overcome, but they are confident that with their expertise, dedication, and the support of their partners and customers, they will continue to thrive for many years to come.

**2014** *accurate contents estimator*

In 2014, Luis Soria and his team engaged AJ and his software team to collaborate on a solution to improve the estimating and job tracking experience for contents professionals. Luis, an experienced and pioneering contents professional, knew that the industry needed a better way to estimate and track contents projects. The result of their collaboration was a software app called Accurate Contents Estimator.

**2016**

Their successful collaboration led to the formation of Exclusively Contents in Buena Park, CA, in 2016. The company was founded on a complete focus on contents, with Luis becoming a master certified IICRC professional. Exclusively Contents quickly established a reputation as one of the leading contents restoration companies in the industry. They worked with the best professionals in the restoration industry, providing unparalleled contents restoration services.

Unfortunately, Luis passed away, but AJ and the Exclusively Contents team persevered through the difficult time and continued to provide their customers with the same level of service and dedication that Luis had instilled in the company.
